Introduction

Athena 101- USB1.1 Fingerprint Reader integrates fingerprint technology into software programmers and personal /confidential data security!

It is not only small and elegant in shape but also has high performance on image capture. Without your fingerprint, no one can read any data in your PC or NB which has been encrypted by Athena series products; and the password bank function also can develop many kinds of application with non-replaceable e-authentication or personal registration function. The application could be e-shopping, e-banking, e-clinic, or club member management like Yahoo. It provides the convenience and security form setting user's unique fingerprint

Athena 101 has with many software functions: Auto-Logon, Screen Saver Lock, Password bank, File/ Folder Encryption.... With Athena 101, you will be just like keeping keys on your hands and your data can be kept in confidence at all times, even in the circumstances when multiple users are using the same PC.

Features

- Up to 10 sets fingerprint enrollment.
- Use chip based sensor for live-scan capturing of 3D-fingerprint Minutiae.
- USB bus power and compact design
- USB1.1 interface up to 12Mbps and plug and play function
- Windows XP/2000 supported.
- Design with small and elegant in shape.
- AIAC-Advanced image auto-calibration technology. No matter dry or wet of your finger skin, it can get clear fingerprint image easily.
- Blue LED light.
- Athena101 with 5-in-1 software:

1.AutoLogin

Offers a solution to automatically login those web pages that needs password or special information input. AutoLogin is an application software which memorizes your verifying data(ID and Password) of website. The next time you visit the same website again, AutoLogin will automatically send your verifying data to the correct columns respectively if your fingerprint is verified ok

2.File/Folder Security

With fingerprint been verified ok, user can easily encrypt or decrypt private files or folders. It becomes decrypted/encrypted only when the fingerprint was successfully verified. Needless of complicated setting, efficiently secure data through File & Folder Security software.

3.Screen Saver Lock

You can instantly start your screen saver with fingerprint or hot key, no need to set waiting time. Only a correct fingerprint authentication can resume your PC from screen saver.

4.Windows Login

Using registered fingerprint, user can login Windows by passing fingerprint verification. Prevent the leakage of password and offer a more convenient way to Windows login.

5.SecureLock

With user's fingerprint successfully verified, Windows Explorer will show up a virtual disk drive which was created by SecureLock from the available hard drive space of your PC. The function of the virtual hard drive is exactly the same as normal hard drive. Every byte of data stored into this virtual drive is safely encryption at the moment it is written, And it become decryption only when the fingerprint was successfully verified. The size of virtual hard drive can be adjusted by user.
